Installation Steps

Turn off the power at fuse or circuit box

1. Attach the threaded pipe to the mounting strap, and then secure it with a washer and a hex nut.

2. Attach the mounting strap to the outlet box using two mounting screws.

3. Secure the top loop to the threaded pipe.

4. Connect the chain:
   - Determine length of chain needed to achieve desired fixture height. (To remove excess chain section, use pliers to bend link open.)
   - Weave the fixture wires and fixture grounding wire through the chain, collar and canopy.

5. Connect one end of the chain to the loop using a loop lock.

6. Connect another end of the chain to top loop by using another loop lock.

7. Thread the fixture wire and fixture grounding wire through the top loop, threaded pipe and mounting strap.

8. Pull out the source wires from the outlet box. Make wire connections using wire nuts as follows:
   --- Connect the smooth-coated wire (marked) from the fixture to the black wire from the power source.
   --- Connect the ribbed-coated wire (unmarked) from the fixture to the white wire from the power source.
   --- Attach the fixture grounding wire to the mounting strap with the green grounding screw, and then connect it
      to the house grounding wire with a wire nut.
   Carefully put the wires back into the outlet box.

9. Attach the canopy to the mounting strap, insert the top loop through hole, and then secure it by tightening collar.

10. Install a bulb (not included). Check relamping label at socket area or packaging for maximum allowed wattage.
